Program Highlights

Haiti

Upgrades to a solar power system in Crève provided consistent electricity for schools, churches, and a medical clinic. Over 200 children received schooling, and more than 3,600 patients were treated at the clinic.

In the north and northeast, the Goat Loan Program that was launched 2 years ago with 60 people, expanded by the end of 2025 to 185 participants. More than 400 farmers received seed kits and training, and 10 Savings Groups established over the last two years are empowering more than 248 people.

In Anse Rouge, construction was begun on a new church building that will also be used as a community development hub.

Zambia

In Mabo Kunda, 9 churches worked together on the construction of the Christian Farmers Association (CFA) building. The building houses a shop, storage rooms, and a seed mill, all of which add significant value in the local economy. The collaboration on this project has fostered unity and grown a very positive reputation for the churches in the wider community.

Other outcomes in Zambia include:

- 32 loans of seed and fertilizer facilitated in Mabo Kunda
- the purchase of two trenching machines to help expand access to clean water more efficiently and sustainably
- 30 children received vital medical care.

Rachel Chilonde was one of those children. She was born with a double club foot, and her feet were so twisted that she was unable to walk. After multiple trips for surgery in Lusaka, Rachel is finally finished her treatments and is now in the process of healing and learning to walk.

Program Highlights

Zimbabwe

800 people were trained in more effective and sustainable agriculture in Makamure, Chikofa, and Matabeleland, Majiji and the Heany communal lands.

“We never imagined our land could produce food, but God has shown us that with His ways, even poor soil can bring life. Our children will eat from our own harvest this year — this is a miracle for us. Farming God’s Way is not only feeding us, it is teaching us to walk with God.”

— Mr and Mrs Moyo, farmers in Majiji

Pakistan

Sewing Centres provided training in essential job skills for 20 women. Those wanting to start their own home business also received a sewing machine, and iron, an iron stand, scissors, clippers, and other equipment.

Tutoring initiatives benefitted 25 students, helping their families become more aware of the importance of education, and allowing the children to continue studying rather than enter the labour force at a young age. The tutoring helped the students develop confidence, discipline, and hope

Financial Report

Revenue

Donations

General	\$67,630

Total Projects	\$208,758
Total Expense	\$265,709

Staying the Course in 2025

During a year of mounting global tension and uncertainty, our partners' unwavering focus helped their communities deepen resilience and lay the foundations for a more hopeful future. In Zambia, experimentation with biochar brought significant improvements to agricultural yields; in northwest Haiti, improvements to a solar power system kept the lights on and water flowing, while in central and northeast Haiti, loan programs enabled farmers and small business people to keep growing their income.

What is particularly encouraging for me is that this excellent work is being done humbly and selflessly by committed followers of Jesus, and people in their communities recognize that. In a world of growing cynicism toward Christianity and the Church, trust is being re-established in these communities, and people are once again seriously considering the significance of the Good News of Jesus for their lives.

Thank you for joining with us in support of such life-transforming work!

Greg Reader
Executive Director

A Word from our Board Chair

Thank you for all the ways you supported this work in 2025. Your prayers, financial gifts, and words of encouragement empowered our work and helped to bring hope and positive change to hundreds of people. What a joy it is to serve Jesus in this way!

Alan Veale, Board Chair
